

Macrophage self renewal and aging

Who: **Michael Sieweke, Ph.D.**

Alexander von Humboldt Professor / Directeur de Recherche

RESEARCH PROFILE:

Expert on macrophages and hematopoietic stem cells. Principal research interests: Innate immunity. Cell fate decisions and self-renewal in stem cells and differentiated cells. Stability and plasticity of cell identity. Role of macrophages in immunity, tissue homeostasis and regeneration.

Technische Universität Dresden
Center for Molecular and Cellular Bioengineering (CMCB)
Center for Regenerative Therapies (CRTD)

When: December 05, 2019, 4 pm

Where: Nucleus (FLI 1)

Host: K. Lenhard Rudolph
